2005-2006 Employment Survey Candidate Results

To get a more accurate picture of employment trends in the field, the AAR and the SBL have expanded our data collection efforts. To this end, the EIS Center created a webbased, anonymous survey to track hirings by specialization and to collect demographic information on job candidates. In the spring of 2006, surveys were sent to the 497 candidates who registered for the 2005 Employment Information Services Center. Of the 497 solicitations, 237 responses were received (47.69% response rate). Below are complete results of the survey. The survey is performed online, and the horizontal lines below represent a new page of questions.

Responses to this survey are anonymous and every question is optional.
